Work Experience

Software Engineer **Aug 2023 - Dec 2024**
Dentsu Data artist Mongolia *Full-time, Ulaanbaatar, Mongolia*

- Analyzed and structured +10,000 data points by imdb rating, description, and genre to develop an AI-powered movie recommendation system
- Developed a responsive Next.js interface for a fine-tuned Generative AI model, improving usability and ensuring cross-browser compatibility for +1,000 daily users
- Optimized a Generative AI web application by implementing virtual scrolling, reducing image rendering latency by 1.1 seconds and improving user experience across browsers
- Developed a smart golf mapping application that tracks course holes and player scores in real time, total of geographic 11 coordinates
- Implemented PDF context tracking to enhance user navigation, enabling section-based page saving and reducing manual scrolling, resulting in a 40% improvement in user experience.
- Developed a marketing strategy analysis system powered by Vertex AI, enabling product similarity detection, pros/cons comparison, auto-generated descriptions, and 4K product imagery

Software Engineer **Aug 2022 - Aug 2023**
Nest Educational IT school *Full-time, Ulaanbaatar, Mongolia*

- Developed a robust database architecture in MySQL (phpMyAdmin) to process and track 2,000+ deliveries each day, integrating cargo logistics, driver updates, product tracking, and warehouse management into a unified system. Focused on scalability, secure updates, and high availability to streamline delivery operations and improve organizational efficiency
- Implemented RESTful API service in nodejs for smooth system integration and reliable +1600 data transactions .
- Implemented dashboard to track every order and delivery status, showing information of each delivery driver, orders by their address, status, and sales growth
- Developed an agile web application for a delivery management system, streamlining logistics and order tracking. Achieved an 80% increase in daily deliveries, a 40% growth in individual user sales, and a 20% expansion in overall market reach

Internship Experience

Software Engineer **May 2021 - Sep 2021**
Erxes Inc *Internship, Ulaanbaatar, Mongolia*

- Implemented a personal Possessions Information module within the ERP system, enabling the secure tracking of over 100 employees' personal asset values and ensuring accurate record management.
- Designed and deployed a centralized ERP template library, streamlining document creation processes and improving overall employee productivity by 20%.
